

JBL VERTEC DrivePack V4 PRESETS -AN, -CN MODELS README FILE

OVERVIEW

JBL VERTEC DrivePack V4 presets are provided with this version of System Architect software. The upgrade device files were installed on your computer during the System Architect software installation process. V4 device files are accessible either directly from the My Documents folder on your computer desktop or through the Windows folder hierarchy.

JBL VERTEC DrivePack V4 device files are located in the following directory on your hard drive:

Desktop\My Documents\Harman Pro\Device Files\VerTec DP

or

C:\Documents and Settings\<user folder>\My Documents\Harman Pro\Device Files\VerTec DP

IMPORTANT NOTE

Input sensitivity of VERTEC powered systems has been engineered to ensure compatibility with passive JBL VERTEC enclosures powered by amplifiers with 26 dB gain and using V4 processing.

Compared to previously-released VT-DP device files, V4 input sensitivity will be 6-8 dB lower (model-dependent). For increased input sensitivity, input gains can be adjusted as necessary in the software control panel to achieve the desired gain structure.

Installing V4 DSP into JBL DrivePack devices:

To load V4 presets into your JBL DrivePack device, simply select the device and open the appropriate device file.

Open Device File Instructions:

1. Select single or multiple devices of the same speaker type in Venue View. The device or multiple selected devices will become highlighted.
2. Right mouse click over the highlighted device(s). A drop down menu will appear.
3. Select Open Device File in the drop down menu.
4. Windows Navigator opens, navigate to the Vertec DP device folder.
5. The correct device file for the selected device will appear in the navigator window. Select the V4 device file then click the Open button located at the bottom right corner of the window.
6. The file loads, the navigator window closes and the "Synchronize Device Settings" window opens.
7. Check the "Include Device Presets" box in the "Send Settings To Device" sub panel.
8. In the "Send Settings To Device" sub panel, click on the Yes (for single device) or Yes to All (for multiple devices) button.

For detailed information on loading/opening JBL DrivePack device files see JBL HELP for “Open Device File”. The Help page is located in System Architect Help under JBL Products/Common Controls/Open Device File

Disclaimer: VerTec V4 limiter settings are intended to provide a starting point for optimum system performance while ensuring reliable system protection. However, the end user is ultimately responsible for system operation in the field and standard warranty conditions apply in the event of component damage.

Please refer to the appropriate “JBL VerTec DrivePack V4 PRESET SUMMARY” sheet to determine the correct preset to use for your configuration.
