

JBL PRO CONNECT V3.0- RELEASE NOTES

Public Release – V 3.0

New Features Implemented:

- Secure user account management
- Cloud-based snapshot synchronization
- Advanced snapshot management
- Snapshot sharing
- Conflict Detection & Resolution
- User Experience Modes: Basic (Novice) and Advanced (Expert)

Note: *Please note that users logging in for the first time will experience an automatic migration of existing local snapshots to the cloud. It is recommended that users remain online during first login to ensure successful synchronization.*

Features & Improvements

User must be logged in to enable cloud-based features.

1. Secure User Account Management

- Secure signup and authentication flows
 - Password reset and change support
 - Marketing email preference management
 - Session invalidation on sensitive actions
 - Logout disabled in **Basic Mode** to avoid accidental lockout
-

2. Cloud Synchronization & Reliability

- Automatic sync on login, logout, and snapshot updates
 - Manual **Sync Now** option for user-initiated recovery
 - Multi-device simultaneous login support
 - Offline operation with deferred cloud sync
-

3. Snapshot Management

- Snapshot create, rename, delete (single & bulk)
 - Upload and download snapshots
 - Storage enforcement: **Maximum 40 snapshots**
 - Guided resolution when storage limit is exceeded
-

4. Snapshot Sharing

- Secure snapshot sharing with registered users
 - Notifications for shared snapshots
 - Accept or reject workflows with storage and naming validation
-

5. Conflict Detection & Resolution

- Explicit conflict handling with no silent overwrite
- Supported conflict types:
 - Name conflict
 - Data conflict
 - Delete conflict
- Guided user actions for resolution

6. User Experience Modes

Mode	Description	Key Characteristics
Basic Mode	Designed for novice users	Guided workflows, minimal configuration, logout disabled
Advanced Mode	Designed for experienced users	Full feature access, faster workflows, fewer prompts

7. PRX 900 SUB – Fixed - The volume value cannot be synchronized when adjusting the app.
