## Preset Release History

### Release 2.1:

- Addressed a gain offset issue with the V20 Bi-Amp presets and 4-Channel amplifiers

### Release 2.0:

- Improved phase response
- Improved LF to MF/HF tonal balance for average sized systems
- Simplified preset selection options
- New preset naming convention
- VTX Subwoofer presets are now universal and can be used with any VTX system

### Release 1.3:

- Improved VTX 25 limiter settings for better protection
- Corrected HPF for VTX V20 Bi-Amp 60 preset

### Release 1.2:

- Corrected VTX S25 LPF for 120 preset option

### Release 1.1:

- Preset naming improvements

### Release 1.0:

- Initial VTX V20 Preset release

## Preset Name Description

- FL (FILL) = Preset nominal frequency response suitable for front fill use
- Full Range Presets = The full-range preset for **V20** extend the system frequency response down to **60Hz**
- 80 = Refers to an 80Hz high-pass or low-pass filter
- REAR = Cardioid preset to be used for the rear facing subwoofer enclosure

## Notes

- The most up to date versions of all VTX presets are always included in the latest version of JBL's Performance Manager™ software.
- Make sure the latest Crown Audio I-Tech HD firmware is used
- Arbitrary preset combinations can be created using JBL's HiQNet Performance Manager™ control software
- For more information on preset selection refer to the VTX V20 User Manual
