

## REVISION HISTORY

### Version 1.0:

- Initial AE Series Compact models EASE GLL release.

### Version 1.1:

- Addressed an issue where the horn rotation selection was also rotating the cabinet. Going forward, horn rotation is controlled inside the GLL while cabinet rotation is controlled from the main EASE user interface.
- Updated the names in the product selection drop-down menu to correctly reflect horn orientation.

### Version 2.0:

- Simplified geometry details for easier and faster visualization in EASE
- Updated GLL type for easier sorting and selection between models
- Updated orientations to use a consistent top/center origin, including rotated horn variants
- Updated names and labels to align with Venue Synthesis
